

### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions/listings of claims in the application:

#### Listing of Claims:

Claims 1-24 (canceled)

25. (currently amended) A foam coating for enclosing a composition, ~~the coating comprising a foam component,~~ having a foam matrix comprising a polymeric material, ~~said foam component wherein the coating is~~ adapted for stability upon contact with air and instability upon contact with water, and the composition is selected from the group consisting of a cleaning composition, a fabric care composition, a fabric conditioning composition, and mixtures thereof.

26. (currently amended) The coating according to claim 25, wherein ~~said~~ the composition is a solid or non-aqueous liquid composition.

27. (previously presented) The coating according to claim 25 wherein the coating is at least partially disintegrated, dispersed, denatured and combinations thereof upon contact with water.

28. (currently amended) The coating according to claim 25, wherein ~~said~~ the coating comprises an elastic modulus of less than about 10 GN.m<sup>-2</sup>.

29-31. (canceled)

32. (previously presented) The coating according to claim 25, wherein the polymeric material comprises a water-soluble polymer and/or a water-dispersible polymer.

33. (currently amended) The coating according to claim 25, wherein ~~said component comprises the foam matrix has~~ a relative density of from about 0.05 to about 0.9.

34. (canceled)

35. (currently amended) The coating according to claim ~~34~~ 25, wherein ~~said the composition comprises an additional ingredient is~~ selected from the group consisting of: dyes, enzymes, perfumes, surfactants, brighteners, bleaches, bleach activators, fabric softeners, fabric conditioners, antibacterial agents, effervescing systems and mixtures thereof.

36. (currently amended) The coating according to claim 25, wherein ~~said foam component~~ the foam matrix further comprises a stabilizer, acidic material and/or plasticiser.

37. (currently amended) The coating according to claim 36, wherein ~~said~~ the plasticiser is selected from the group consisting of: glycerol, ethylene glycol, diethyleneglycol, propylene glycol, sorbitol and mixtures thereof.
38. (previously presented) The coating according to claim 25, wherein the polymeric material comprises a water-soluble polymer selected from the group consisting of: polyvinylalcohol, polysaccharides, polycarboxylic acids, cellulose, modified cellulose, gums, derivatives of said polymers and mixtures thereof.
39. (currently amended) A composition enclosed by the coating according to claim 25, wherein the composition is a solid or liquid composition selected from the group consisting of a cleaning composition, a fabric care composition, a fabric conditioning composition, and mixtures thereof.
40. (currently amended) A solid composition at least partially enclosed by the coating of claim 25, wherein the composition is a cleaning composition, a fabric care composition, or a fabric conditioning composition.
41. (previously presented) A pre-dosed amount of a solid or liquid composition at least partially enclosed by the coating of claim 25, wherein the composition is a cleaning composition, a fabric care composition, or a fabric conditioning composition.
42. (currently amended) The composition according to claim 41, wherein ~~said~~ the coating is in the form of a pouch or three-dimensional coating.
43. (previously presented) The composition according to claim 41, in the form of a flowable composition, single granule or tablet.
44. (canceled)
45. (previously presented) An absorbent article comprising the composition according to claim 39.
- 46-47. (canceled)
48. (currently amended) A method of delivering a solid or non-aqueous liquid composition using the coating of claim 25, the method comprising the steps of enclosing ~~said~~ the composition in the coating and delivering ~~said~~ the composition to an aqueous environment, wherein the composition is selected from the group consisting of a cleaning composition, a fabric care composition, a fabric conditioning composition, and mixtures thereof.

49. (currently amended) A method of delivering a pre-dosed amount of a solid or non-aqueous composition using the coating of claim 25, ~~said the~~ method comprising the steps of enclosing ~~said the~~ pre-dosed amount in the coating and delivering ~~said the~~ composition to an aqueous environment, wherein the composition is selected from the group consisting of a cleaning composition, a fabric care composition, a fabric conditioning composition, and mixtures thereof.
